

## TOOL PROPOSAL FORM

The range of training tools we are able to offer is limited only by good practice, and by the time needed to develop them. We encourage members of the small arms control community to suggest additional tools which they may wish:

- To develop themselves, and have listed on the TRESA website, or
- To develop in co-operation with TRESA, or
- TRESA develop itself.

This document is intended to provide you (the proposer) and us at TRESA with a common language. We request that you do not send us a full draft of your material until we get back to you.

Name of proposed tool:.....

What is the tool supposed to accomplish (e.g. train groups/individuals in ...; help establish a baseline for ...; supplement TRESA module ...; ...). Try to be as concrete and as concise as possible:

- a.....
- b.....
- c.....

Why do you think this tool is necessary (provide some background to your idea. Keep in mind that something similar might already be incorporated into a TRESA or other module)

.....  
.....  
.....

How extensive a tool do you envision (something brief like this form, a one or two day module], something else)?

Please see the TRESA website [www.tresa-online.org](http://www.tresa-online.org) for the definitions of modules and tools

.....  
.....  
.....

What sorts of resources are needed for this tool (Is it a form? A video? A role-playing exercise?: What sorts of time frame, manpower, pre-planning does it require?)

.....  
.....  
.....

How do you envisage it being used (type of audience; as a module within course ..., for general use in any course, ...)

.....  
.....  
.....

Your name: .....

Organization: .....

Address:.....

Telephone/Fax: .....

e-mail: .....

Do you prefer to (tick one or more possibilities):  
Develop the tool yourself and publish it on the TRESA website?  
Work in partnership with TRESA to develop the tool?  
Have TRESA develop the tool following your proposal?

We will attempt to contact you as soon as possible with a response.
